

Factsheet

Actively Managed Certificates ("AMCs") are not collective capital investments within the context of the Federal Act on Collective Investment Schemes ("CISA") and are therefore neither governed by the CISA nor subject to supervision by FINMA. Accordingly, Holders of the Product do not have the benefit of the specific investor protection provided under the CISA. Holders of the Product bear the issuer risk.

Risks

Issuer Risk	The value of structured products may depend not only on the performance of the underlying but also on the creditworthiness of the Issuer, which may change during the term of the structured product. The investor is exposed to the risk of default of the issuer.
Market Risk	The general market performance of securities is dependent, in particular, on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries. Changes to market prices such as interest rates, stock prices or corresponding volatilities may have a negative effect on the valuation of the underlying or the structured product. There is also the risk of market disruptions or other unforeseeable occurrences concerning the respective underlying and/or their stock exchanges or markets taking place during the term or upon maturity of the structured products. Such occurrences can have an effect on the time of redemption and/or on the value of the structured products.

Tax treatment in Switzerland

For individual investors holding the Product for private investment purposes with tax domicile in Switzerland the portion of income realised on the underlying Strategy-Level attributable to their respective portion in the underlying Strategy-Level will be subject to Swiss income taxes on an annual basis (by financial year end) or upon redemption. Gains and losses realised on the Strategy-Level as well as gains and losses derived from the sale of the product should be considered as income tax-free private capital gains and non-tax deductible private capital losses respectively. The Product is not subject to the Swiss withholding tax and not subject to Swiss securities transfer tax.
